58KHZ LOOP SYSTEM

Loop Controller 370 x 230 x 90 mm
Receiver Antenna 130 x 40 x 20 mm
Alarm Sounder 40 mm diameter

◀ Ideal for retailers who want a discreet security solution or where store design dictates that security pedestals simply will not do. This solution opens up the front of the store and leaves the customer entrance less congested. Small receiver antennae fit neatly on the door frame either side of the door way protecting the entrance without the need for pedestals.

◀ A hidden solution for entrances up to 12 metres wide. This solution opens up the front of the store and leaves the customer entrance less congested. The system is ideal in situations where it is neither possible or desired to run unsightly cables and have receive antennae mounted around the door opening. The 58KHz floor mat system works in conjunction with hard tags only and a range of accessory tags.
